AGE & RENTING

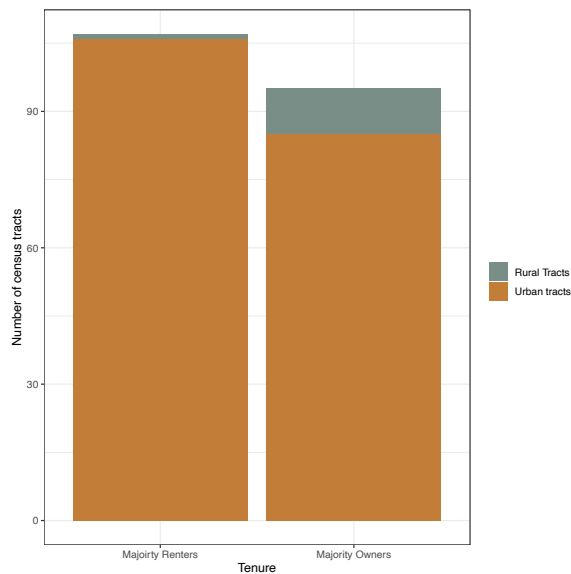

In Fulton county, a scatter plot with a trend line demonstrates a clear relationship between median age and percentage of households in rented homes.

AGE & TENURE

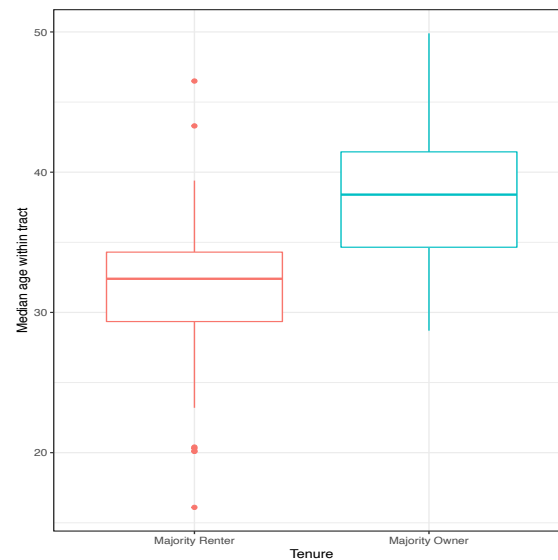

A black and white box plot is another way to represent the relationship between age and tenure.

TRACTS/TENURE/URBAN

Adding color to a bar graph is a simple way to clearly visualize three variables. The graph reveals two trends: there are more majority renter tracts in Fulton County than majority owner ones and majority own tracts are more likely to be rural tracts than majority renter ones.

AGE/TENURE/COLOR

Adding color to the above box plot helps to distinguish majority owner from majority renter
